

**FOLLOWING EXTENSIVE TRIALS WE HAVE CREATED THE MOST BALANCED PROGRAMME ON THE MARKET.**

- WEANING PHASE:**..... Weaning period reduced by 60 days.
- STARTER PHASE:**..... 3 kg per day consumed at age 70 days.
- GROWTH PHASE:**..... Maximum digestibility of consumption through BALANCE. Protein, energy and starch. No feed is lost through UNDIGESTED SOFT MATTER.
- MAXIMEAT FINAL ENERGY PHASE:**..... Excellent conversion ratio obtained through application of a proven formula at each PHASE of growth.

**ONE SINGLE FATTENING FORMULA IS NOT THE SOLUTION - YOU NEED A WELL FORMULATED PROGRAMME.**

**WEANING, STARTER, FATTENING AND FINAL FEED PHASE PROGRAMME:**

<p><b>Raltec Blue Sky Weaning Milk Substitute;</b>Formulated with NATURAL enteric preventive elements. Especially for dairy herds and early weaning.</p>	<p>Give 2 feeds of 1.5 litres of milk for a week. Eliminate 1 milk feed in the 2nd week and continue until weaning in the 6th week.</p>
<p><b>Raltec Rapilac TC-01 Weaning;</b> Immediately appetising flour gruel. Stimulates rumination and appetite.</p>	<p>Give at will from the 4th day of life until the 40th.</p>
<p><b>TL-615 12% Starter Core;</b> To produce maximum growth Starter Feed.</p>	<p>Give this formula from age 40 to 90 days.</p>
<p><b>TC-620 0.5% Energy Fattening Corrector</b></p>	<p>Intensive ENERGY Programme fattening formula for ages 90 to 180 days.</p>
<p><b>TC-630 1% MAXIMEAT Final Energy Feed Corrector</b></p>	<p>ENERGY Programme FINAL FEED FORMULA from 180 to 360 days.</p>

**NOTE: For the Final Feed Formula, Palm Oil, Rapeseed Oil or Lard must always be used.**
